<b>Office Action Summary</b>	<b>Application No.</b> 10/585,669	<b>Applicant(s)</b> HOSHIBA ET AL.	
	<b>Examiner</b> Jeffrey J. Restifo	<b>Art Unit</b> 3618	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION**

***Election/Restrictions***

1. The requirement for election has been withdrawn.

***Claim Objections***

2. Claim 14 is objected to because of the following informalities: Claim 14 recites a “third level” and the second level was introduced in claim 13. For examining purposes the examiner has assumed claim 14 to depend upon claim 13. Appropriate correction is required.

***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-4 and 8-14 are rejected under 35 U.S.C. 102(b) as being anticipated by Gruenwald et al. (US 6,651,759 B1).
5. Gruenwald et al. discloses a hybrid vehicle comprising a motor 18, 22, generator 28, engine 26, axle (not numbered), battery or accumulator 20, auxiliary machine or air conditioner and power steering (not numbered), a voltage measuring module (not numbered) and control module 14, wherein voltage to said auxiliary equipment, such as A/C and power steering, is decreased when available voltage of the accumulator is

Art Unit: 3618

below a first preset level or above a second preset level defining a range, in order to maintain the motor voltage required as shown in figures 1-10.

6. With respect to claims 9 and 10, the drive, input, and output shafts of the engine, motor, and generator are all inherent for the system to operate and are also considered conventional in the art.

7. With respect to method claims 11-13, the method recited in these claims is inherently met in the operation of the hybrid controller of Gruenwald et al. described above.

### ***Allowable Subject Matter***

8. Claims 5-7 and 14 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

9. As allowable subject matter has been indicated, applicant's reply must either comply with all formal requirements or specifically traverse each requirement not complied with. See 37 CFR 1.111(b) and MPEP § 707.07(a).
